Groundbreaking Event, July 16, Sanford's RiverWalk Phase II

The City of Sanford will hold a groundbreaking ceremony at 10 am on July 16th, at 901 W. Seminole Boulevard, near the intersection of French Avenue and U.S. 17/92 in Sanford, Florida.

This exciting opportunity will expand Florida's award winning and internationally recognized RiverWalk westward another 3,100 feet. Phase II will extend the existing Sanford RiverWalk from French Avenue to the Central Florida Regional Hospital. Funding for this \$4.6 million dollar project is provided from the Florida Department of Transportation Local Agency Program and the Seminole County Second Generation One-Cent Sales Tax.

The City is currently pursuing funding for the final Phase III project. Phase III will connect the City of Sanford to the Seminole County Trail system and span from French Avenue to I-4 along the pristine St. Johns River, providing recreational users exceptional opportunity to explore and view the beautiful aspects that nature has to offer right along Sanford's RiverWalk.
