

Important Notice

Sewer Infrastructure Rehabilitation in the Wynnewood Subdivision Scheduled for October 12 – November 13, 2009

Dear Valued Customer,

October 2, 2009

The City of Sanford is pleased to announce that the City was recently awarded \$2.6 million of American Recovery and Reinvestment Act (ARRA) stimulus funds. The City will be using part of these funds to rehabilitate defective pipe in the public sanitary sewer system within the **Wynnewood Subdivision beginning October 12, 2009 and lasting through November 13, 2009**. The following activities are anticipated:

- **Lining Sewer Pipes** – System rehabilitation will be performed by **American Infrastructure Technologies, Incorporated** using a trenchless method that involves inserting a new liner into the old pipes by way of existing manholes. This method is quick, does not require excavation, and results in minimal disruption to residents. *Please note: An occasional excavation may be needed if an old pipe requires repairs.*
- **Surveying Manholes and Pipes** - As part of the sewer rehabilitation, a surveyor, **Southeastern Surveying and Mapping Corporation**, will obtain manhole information, including GPS locations and the elevations of pipes within the manholes following lining activities.

Just before activities begin, a door hanger, similar to the one shown on the right, will be placed on your door and/or garage entrance to let you know the specific project schedule. All Contractors have passed background record checks and will carry identification. Project signage has been placed at the main entrance to the Wynnewood Subdivision off Highway 46 and will remain there while activities are ongoing.

Thank you for your continued support of the City of Sanford's Department of Water & Sewer Utilities and its efforts to provide environmentally sound and cost-effective sewer service in a safe, cost-effective, environmentally acceptable and approved manner.

Dear Sir or Madam:

AIT Corp. has been awarded a contract to rehabilitate the sewer system in your area. We will be installing a liner in the sewer main your home is connected to on _____, 2008.

We ask that you limit your water usage for the day to prevent any backups into your home. Please do not do laundry or wash dishes during the time we are lining your sewer main. Your connection will be reinstated by late afternoon, and you will be able to use your water without any problems. If you have a manhole in your yard, we will be performing our work through the manhole, and will take great care to protect your property from damage. If you have any questions or problems, feel free to ask one of our employees to send a supervisor to speak to you.

Sincerely,

Tim Bixler
Rehabilitation Project Manager
AIT Corporation

Estimado Señor o Señora:

La Ciudad de Sanford ha adjudicado un contrato a AIT Corp. para rehabilitar el sistema de alcantarillado sanitario en su área. El día _____ de 2009, estaremos instalando un revestimiento a la tubería principal de alcantarillado sanitario donde su casa está conectada.

Le pedimos que limite el uso de agua en este día para evitar el taponamiento de los desagües y los baños en su hogar. Para evitar daños a su propiedad; por favor no lave ropa o haga uso del lavaplatos durante el tiempo en que se está revisando su tubería principal de alcantarillado sanitario. Su conexión será restaurada a finales de la tarde, y entonces usted podrá utilizar el agua sin ningún problema. Si usted tiene una tapa de alcantarillado sanitario en su patio, vamos a realizar nuestro trabajo a través de ese agujero, y tendremos mucho cuidado para proteger su propiedad y evitar daños. Si usted tiene cualquier pregunta o problema, no dude en pedirle a uno de nuestros empleados que envíe a un supervisor para hablar con usted.

Atentamente,

Tim Bixler
Rehabilitation Project Manager
AIT Corporation
